EXPERIENCE

Ihifix Digital Academy, Kaduna, Nigeria — Intern

02/2022 - 12/2022

- Assisted in UI design and web development at Ihifix Digital Academy
- Built responsive layouts with HTML, CSS, and JavaScript
- Debugged and optimized code for performance and usability
- Collaborated with designers, tested UI, and documented code

Hotel Money — Frontend Developer

12/2023 - 06/2025

- Built and maintained dynamic, responsive interfaces for hotel listings, user dashboards, and booking management using **React** and **Tailwind CSS**.
- Integrated **map and location-based search** features, enabling users to discover nearby accommodations and improve booking efficiency.
- Developed **interactive booking flows** with date pickers, availability checks, and real-time pricing updates for an intuitive user experience.
- Collaborated with designers and backend teams to implement **API-driven data fetching, authentication, and payment UI workflows**.
- Optimized app performance and accessibility, reducing load times and improving overall UX across desktop and mobile devices.
- Participated in **Agile development cycles**, contributing to feature planning, testing, and deployment to ensure product stability and scalability.

SKILLS

Languages & Frameworks:

JavaScript, TypeScript, HTML, CSS, React, Next.js, Node.js, NestJS

Styling & UI:

Tailwind CSS, Shadcn/UI, Responsive Design, UI/UX Optimization

PROJECTS

OPEN SOURCE CONTRIBUTOR

12/2022 - present

- Maintainer and active contributor to 15+ open-source projects on OnlyDust
- Led frontend/backend dev on **VeriTix** (NestJS & Next.js)
- Improved UI/UX and fixed design bugs on the **OnlyDust core platform**
- Contributed to developer tooling in **Starknet/Cairo** ecosystem
- Participated in web3 experiments like **Chain Mail** and dev tools
- Regularly perform code reviews and engage in architecture decisions

Leadway Properties & Investment Company — *Information Technology information Technology Trainee Frontend-(Mobile)*

2024-Present

Leadership & Collaboration

- Led a **4-member mobile development team**, reporting as second-in-command to the Head of IT, and coordinated cross-functional collaboration with backend engineers, QA testers, and DevOps.

Feature Development (React Native)

- Built core features for Leadway Health, an HMO mobile application serving 500+ users across Android and iOS, integrating fully with real-time backend services.
- Developed the Gym & Spa access module, enabling users to generate unique access codes covered by Leadway Assurance, improving facility usage convenience and automation.
- Implemented the Appointments system, allowing users to book health appointments and view categorized history (upcoming, past, cancelled), enhancing transparency and user control.
- Built the Report Delay feature, enabling users to escalate slow service experiences directly within the app, improving customer support responsiveness.
- Developed the Health Articles section, delivering curated health tips and wellness content to improve user engagement and education.

Code Quality & Performance

- Collaborated with QA testers to resolve bugs, refine UX flows, and ensure high stability across both platforms.
- Worked with backend engineers to implement **real-time data synchronization**, ensuring accurate and responsive user interactions across all features.
